Template Name	AD Venture: An Integrated Advertisement Ecosystem
Goals & Objective	AD Venture is a comprehensive platform designed to integrate businesses, users, and administrators into a unified advertisement ecosystem. The goal of this platform is to provide an efficient, personalized, and interactive system for managing and engaging with advertisements. From this platform, users can: Businesses (Advertisers): -Create and manage targeted ad campaigns based on demographics, preferences, and location. -Monitor ad performance using real-time analytics, such as views, clicks, and feedback. -Update business profiles and manage posted ads (edit, pause, or delete campaigns). Front Users (General Audience): -View personalized ads tailored to their interests and location. -Save favorite ads to a "Wishlist" for later review. -Search and filter ads by category, location, price, or popularity. -Provide feedback on ads through ratings or comments. -Update profile information and manage preferences for ad categories. Admins: -Review and approve ad postings to ensure platform compliance. -Oversee platform-wide analytics and generate trend reports. -Moderate flagged content and handle disputes between users and businesses. -Configure platform settings like ad categories.
Client Information	Client Types: Advertisers: Businesses and brands looking to create, manage, and optimize ad and ad campaigns. Users (General Audience): Individuals seeking personalized and relevant advertisements. Administrators: Platform managers responsible for maintaining compliance, moderating content, and overseeing analytics.
